

## Module-8: Jenkins Assignment - 1

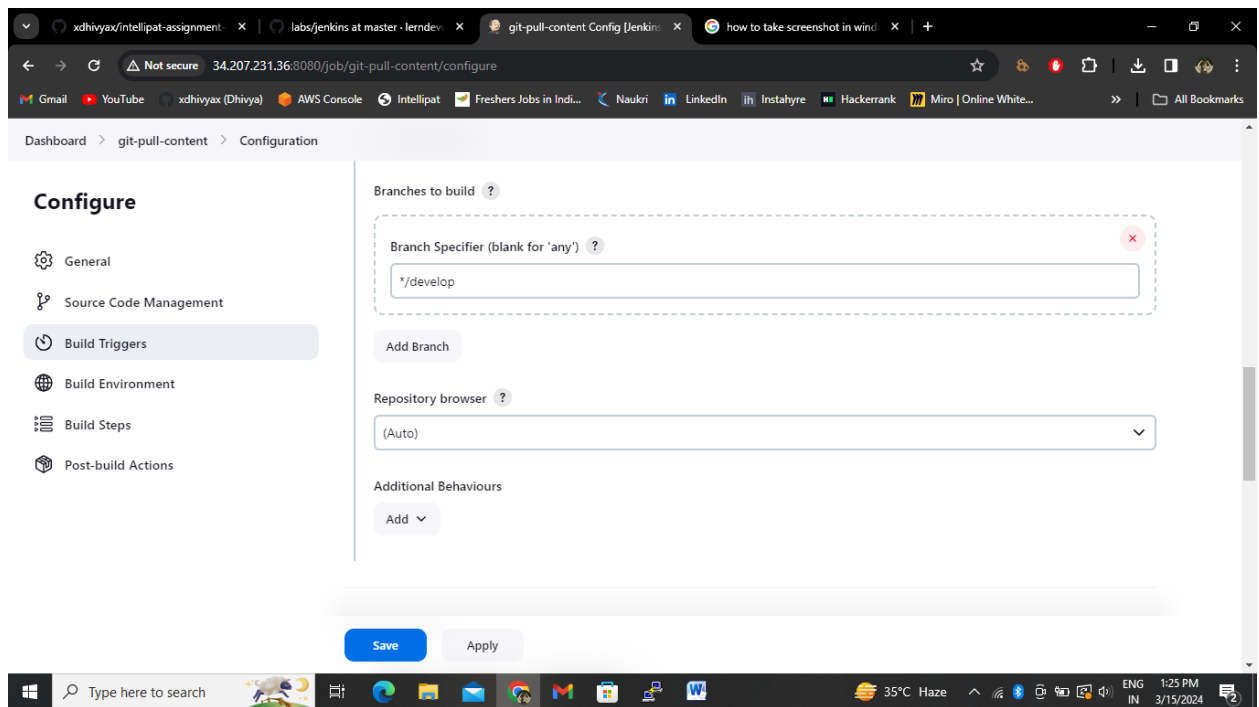

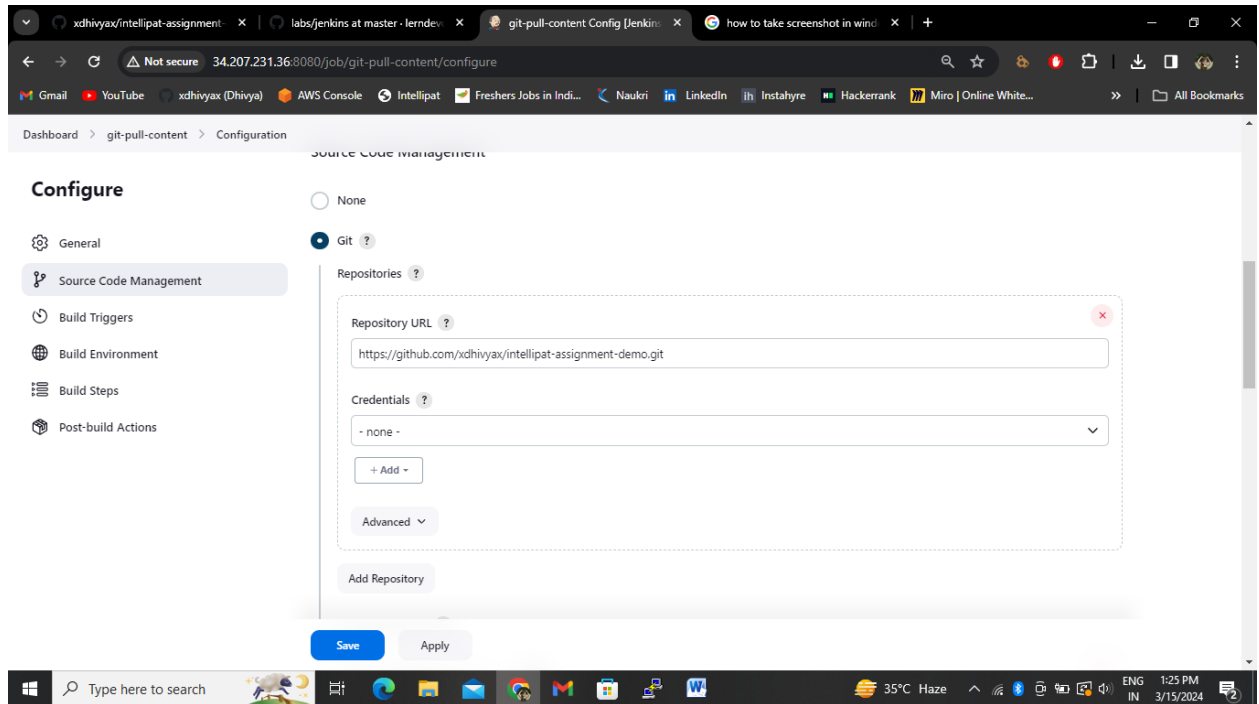

You have been asked to:

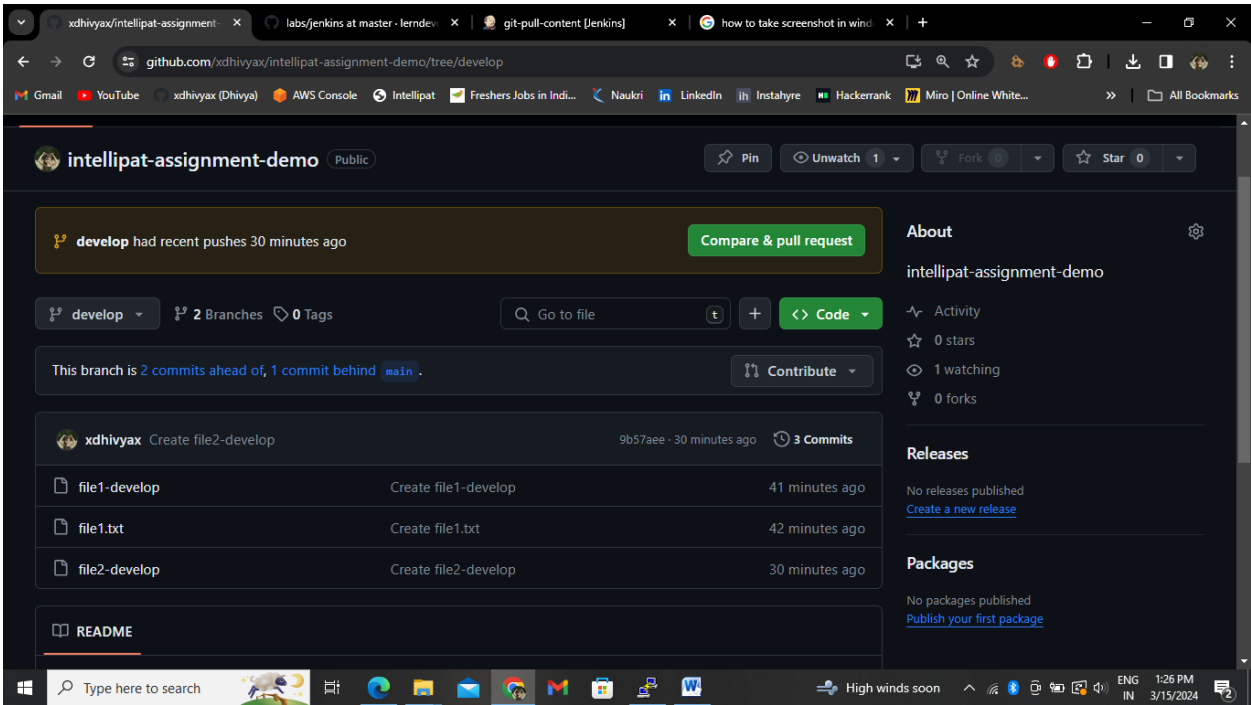

- Trigger a pipeline using Git when push on Develop branch
- Pipeline should pull git content to a folder

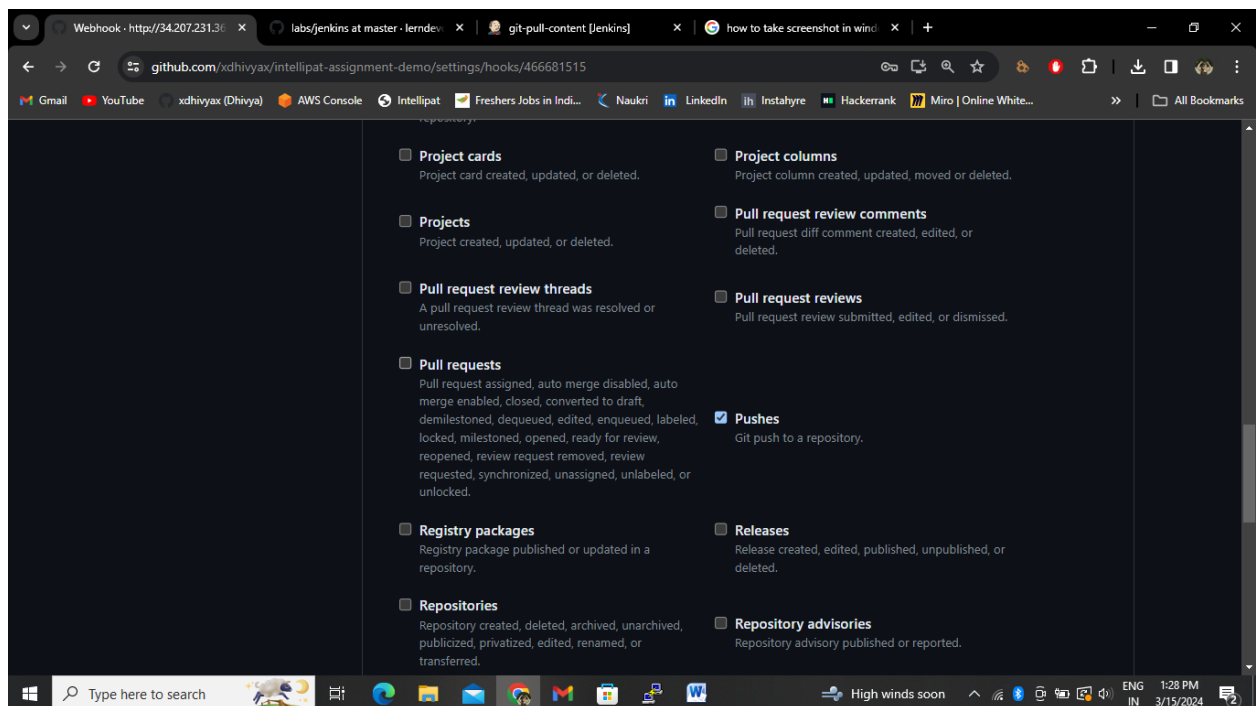

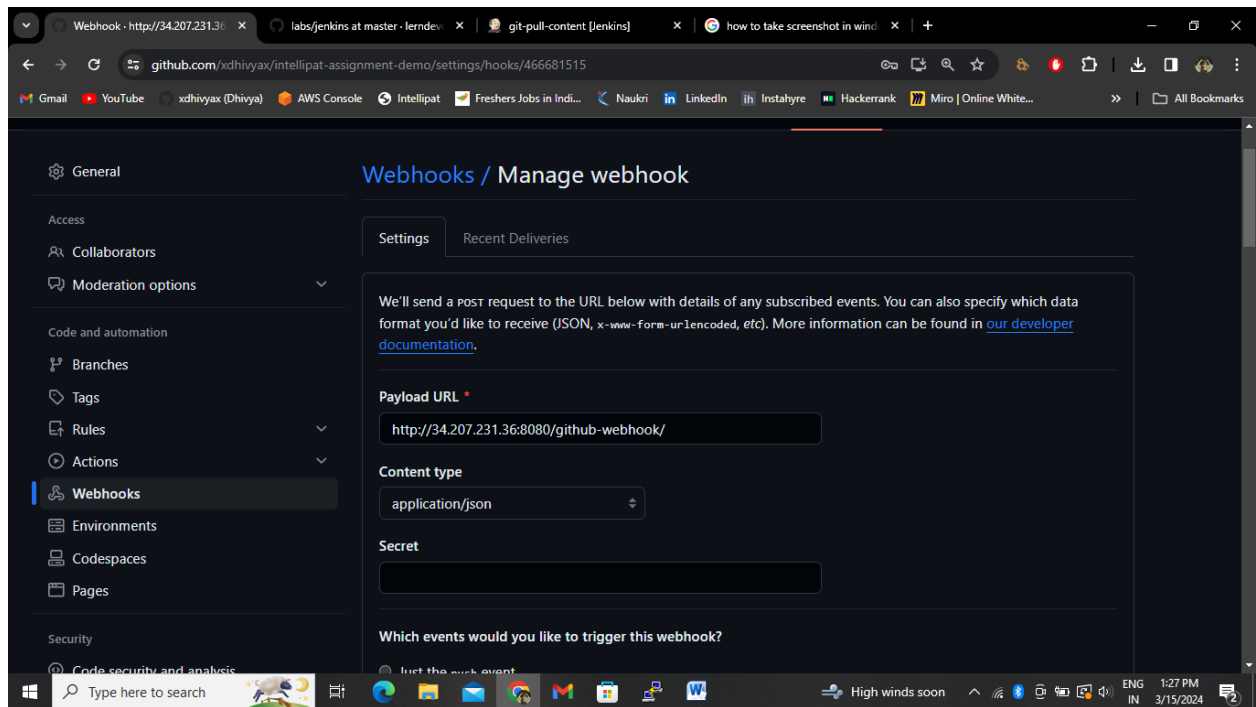

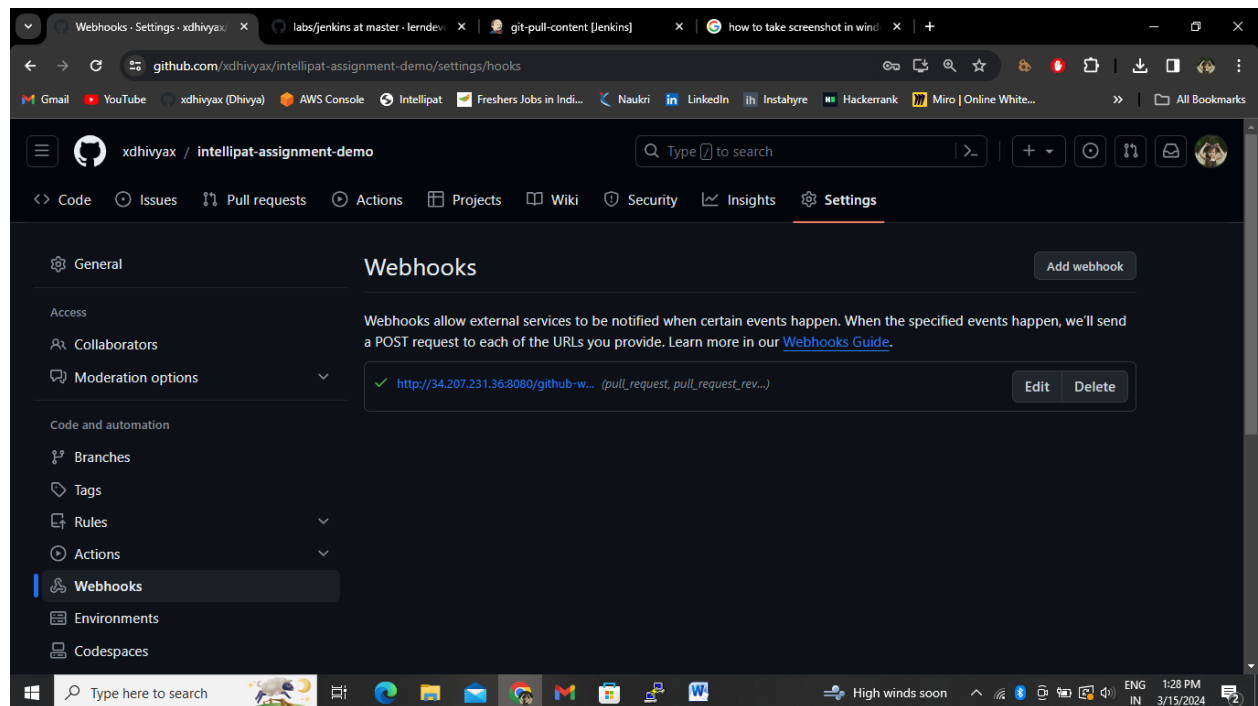

The screenshot shows the Jenkins Dashboard in a web browser. The dashboard includes a sidebar with navigation links: New Item, People, Build History, Manage Jenkins, and My Views. The main content area displays a table of build history for the 'git-pull-content' job. The table has columns for S (Success), W (Warning), Name, Last Success, Last Failure, and Last Duration. The current build is successful, with a duration of 0.38 sec. Below the table, there are sections for Build Queue (No builds in the queue) and Build Executor Status (2 idle executors). The bottom of the image shows a Windows taskbar with various application icons and system information.

S	W	Name	Last Success	Last Failure	Last Duration
✓	☀	git-pull-content	25 min #2	N/A	0.38 sec

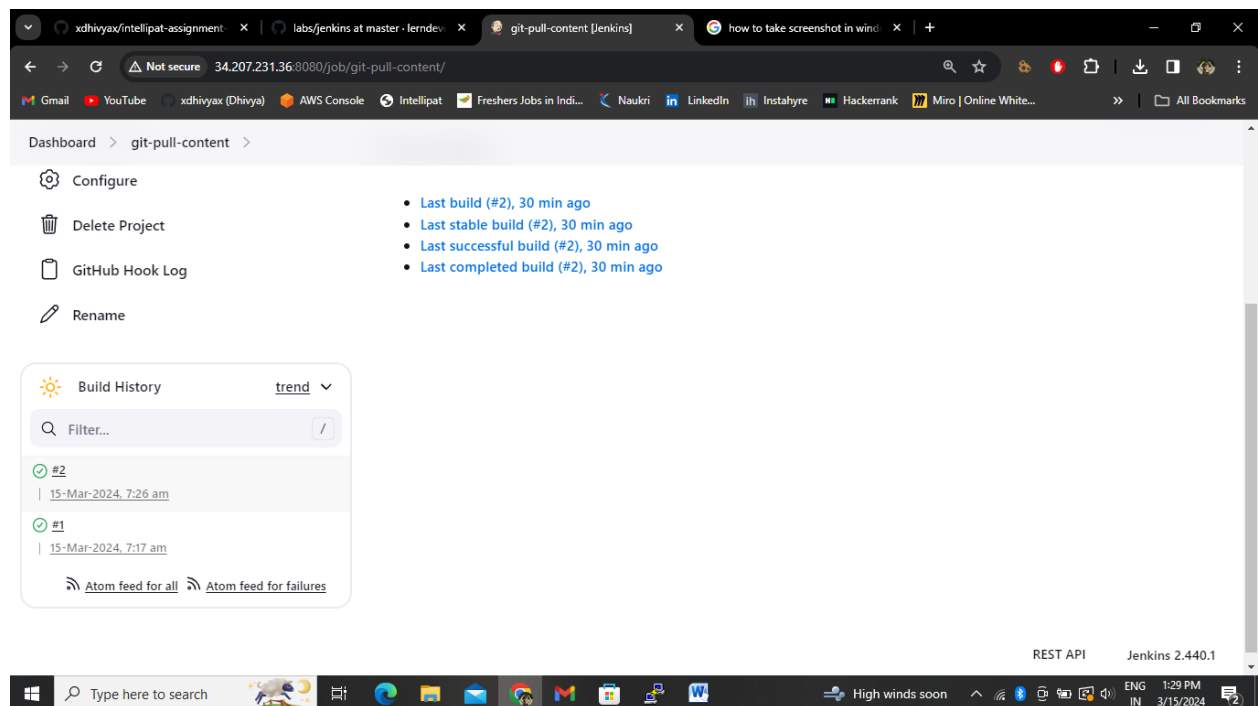

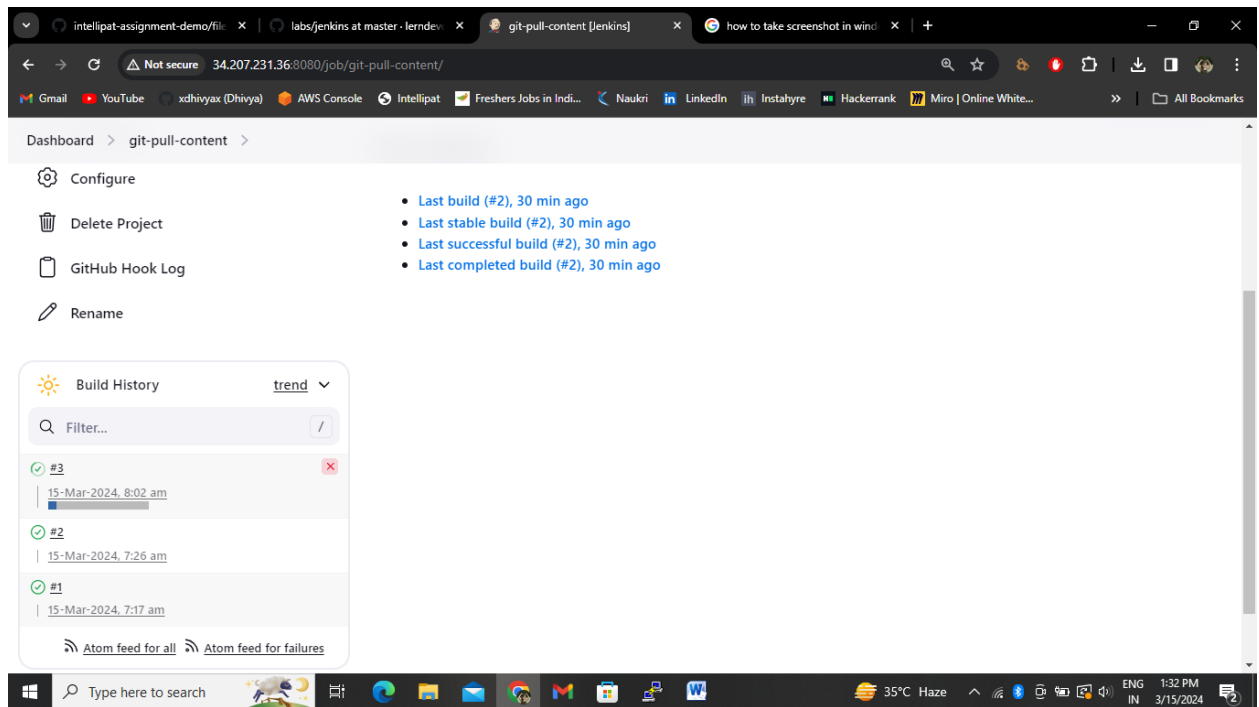

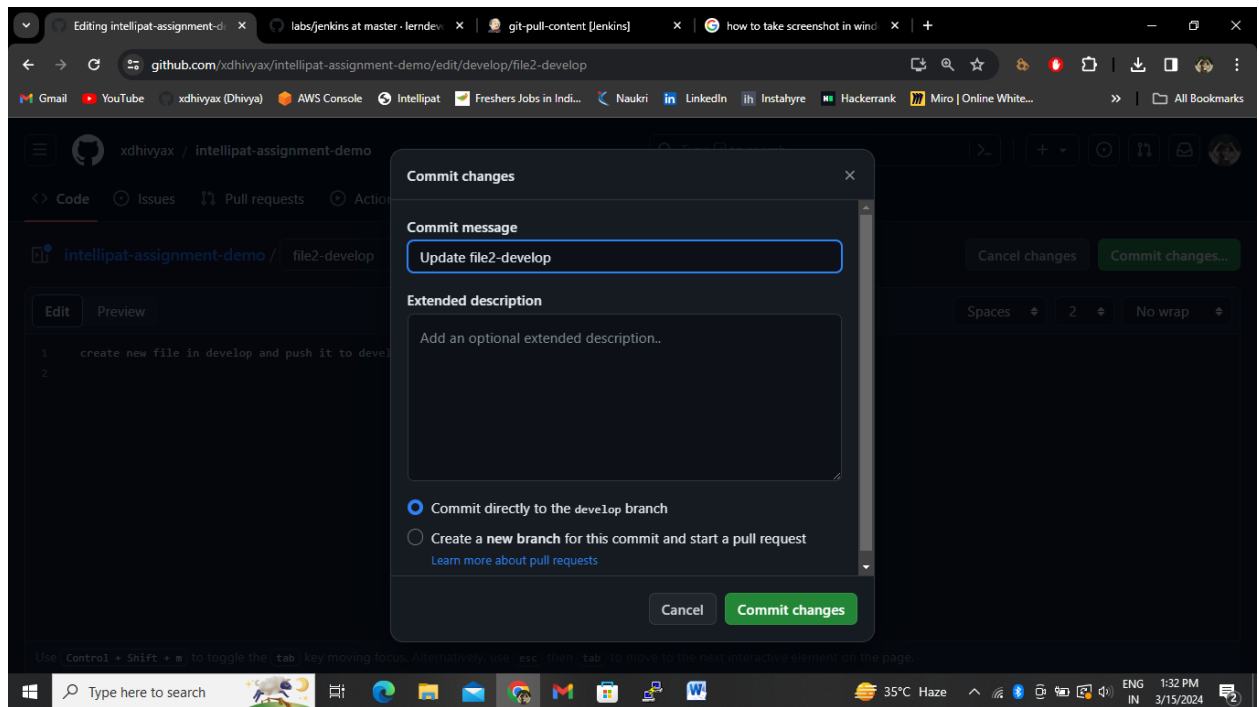

Already 2 build happen now git push event occur it trigger the job/pipeline
